

Training Tester is an electronic instrument that detects and shows in real time the evaluation parameters referring to the athletes who practice "situation sports" (volleyball, basketball, American football...)

Easy to use and precise to do tests...

Training Tester PHT is an electronic instrument that detects and shows in real time the evaluation parameters referring to the athletes who practice "situation sports" (volleyball, basketball, American football...).

In particular, as the volleyball sport practice is concerned, this device consents to do jump and speed tests and training of the setters in very short time .

In jump tests, a real time displayer shows the height reached by the

athlete, in speed tests, it shows the time elapsed between 2 next passes (for instance while training wall displacements, or simple "replay – runnings" and in training tests for the setter it shows the height of the trajectory of the ball.

In speed tests, sensors can reach shoulders level, so the player that passes through the detection area gives the 'on' and 'stop' signals on his own and immediately they show the interval time of the running.

You can also detect how long does it take to the athlete for wall displacements.

This solution is good for coaches that need to do quick controls and haven't familiarity with pc.

EASY TO CARRY

IN THE GYM

EVENTS

1. TRAINING TESTER PROFESSIONAL HI-TECH

This version includes a multifunctional electronic device to do jump and speed tests, equipped with an aluminium frame, a display and an automatic detection positioning system. The device is connected through USB to a portable pc (not included) with application software for the test execution, the parameters calculation and the storage of test results.

2. TRAINING TESTER MANUAL VERSION

This version includes a multifunctional electronic device to do jump and speed tests, equipped with an aluminium frame, a display and a manual detection positioning system. It includes a remote control to choose the kind of test, without the possibility of data storage.

3. TRAINING TESTER ESSENTIAL

This version includes a display, an electronic unit, an optical detection system and a manual detection positioning system attachable to a wall, without aluminium frame.

YOUR TRAINING TESTER

You can choose the price according to your needs, within different bases, manual or automatic detection positioning system, remote control or software, bright leds as visual goals or nothing.

OTHER TEST

MOVEMENT

The movement speed on a direction change, on a relay or on a linear run, can be constantly monitored with Training Tester PHT. The chance to position the sensors to the desired height, consents to customize athletic tests for a team or a single athlete.

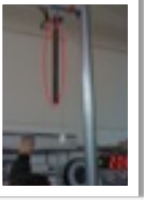

Even in the gym...

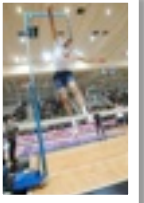

If you are looking for a device to evaluate the fit status of the customers of your private gyms, something that can improve their training sessions, Training Tester PHT is the right solution for you!

OUR PRODUCTS

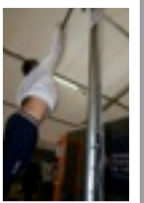

TRAINING TESTER PROFESSIONAL HI-TECH LED

HT LED	Price						
	3020 euro (Transport Included)						
	LED	2 DISPLAY	ENGINE	USB connect	SOFTWARE	MOBILE BASE	AUTOMATIC SETTING
	<p><i>Is the perfect product for athletes at the highest level. its accuracy is the best around an aid for the goal. Useful to all research laboratories for data acquisition in real time on any kind of jump tests or running</i></p>						

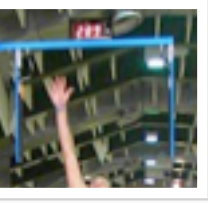

TRAINING TESTER PROFESSIONAL HI-TECH

HT	Price						
	2660 euro (Transport Included)						
		2 DISPLAY	ENGINE	USB connect	SOFTWARE	MOBILE BASE	AUTOMATIC SETTING
	<p><i>Useful for all coaches and athletic trainers who carry out regular test sessions with their teams in the mid to high level athletes</i></p>						

TRAINING TESTER MANUAL VERSION

MV	Price						
	2070 euro (Transport Included)						
		2 DISPLAY				MOBILE BASE	
	<p><i>Easy to allow all coaches to take the test without using a PC, very useful in the youth teams</i></p>						

TRAINING TESTER ESSENTIAL

ESS	Price						
	1640 euro (Transport Included)						
		1 DISPLAY					
	<p><i>Useful tool in schools for a complete monitoring of the physical abilities of its pupils. The processing speed of the test makes it possible to carry out regular test sessions with many students</i></p>						

Training Tester PHT (Professional Hi-Tech) LED:

- Detection Area' sensors with luminous Leds
- Bidirectional Display
- Engine for automatic calibration
- Application Software to execute, manage and store tests and data of athletes
- Sensor for automatic stopping

Training Tester PHT (Professional Hi-Tech):

- Detection Area' sensors without luminous Leds
- Bidirectional Display
- Engine for automatic calibration
- Application Software to execute, manage and store tests and data of athletes
- Sensor for automatic stopping

Training Tester Manual:

- Detection Area' sensors without luminous Leds
- Monodirectional or Bidirectional Display
- Manual calibration of the detection zone, connected to moveable tube
- Remote controller to choose tests and calibrate the height of the detection zone

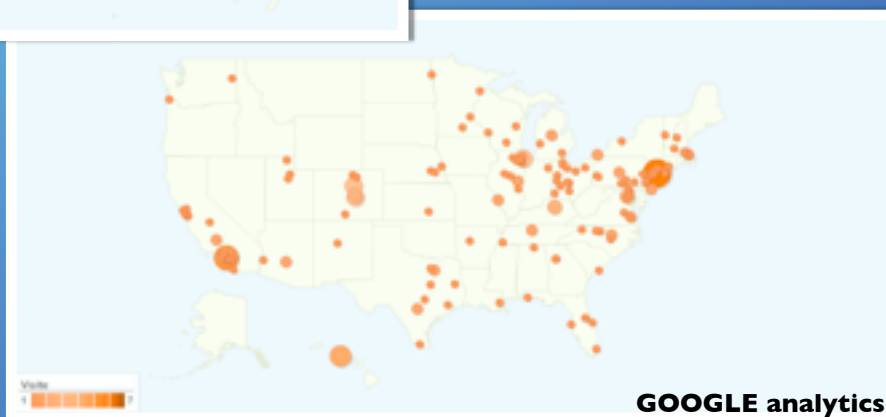

Training Tester Essential:

- Detection Area' sensors without luminous Leds
- Monodirectional or Bidirectional Display
- Manual calibration of the detection zone, connected to clips (supplied) fixed in the wall
- Remote controller to choose tests and calibrate the height of the detection zone

WHERE KNOW US ?

HIGH PERFORMANCE SPORT

VOLLEYBALL

WE KNOW HOW IMPORTANT IT IS IN VOLLEYBALL ELEVATION, AND SINCE THIS IS A FACTOR IN THE FITNESS OF THE ATHLETE, THE ABILITY TO QUICKLY MONITOR CONSTANTLY THE WHOLE TEAM, BOTH ON THE FIELD IN THE WEIGHT ROOM TO BE ABLE TO ATHLETIC TRAINER AND THE ENTIRE STAFF TO CUSTOMIZE AND IMPROVE THE QUALITY OF INDIVIDUAL TRAINING SESSION FOR EACH ATHLETE.

BASKETBALL

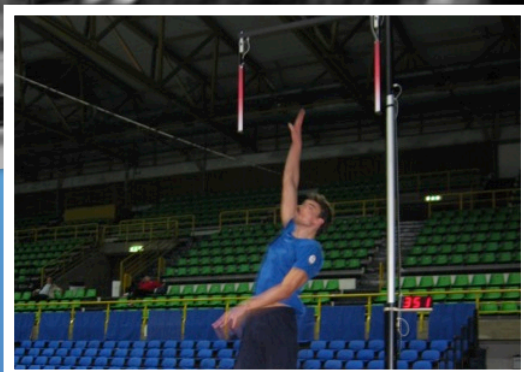

SPEED, ELEVATION, STRENGTH, TRAINING, TEST ALL THE PARAMETERS THAT CAN DETECT ACCURATELY WITH WELL-DEFINED TEST PROTOCOLS. IT WILL NOT BE DIFFICULT TO GATHER DATA QUICKLY ON THE FITNESS OF THE ATHLETE, HOW MUCH OR HOW FAST JUMPS IN THE DISPLACEMENTS.

AMERICAN FOOTBALL

THE VERTICAL JUMP IS USED BY THE NFL (NATIONAL FOOTBALL LEAGUE) AS A TEST DURING THE **NFL SCOUTING COMBINE**. THE ABILITY TO PERFORM IN A PRACTICAL, FAST AND HIGHLY ACCURATE TEST WILL MONITOR YOUR ATHLETES IN A CONSISTENT MANNER THROUGHOUT THE WHOLE SEASON.
